<sup>&</sup>lt;sup>1</sup> NSPT is stapled to National Storage Holdings Limited ("**NSH**") to form National Storage REIT ("**NSR**"). NSR stapled securities are quoted on the Australian Securities Exchange ("**ASX**") – trading code ASX:NSR.

# **DIRECTORS' REPORT**

The Group is a Consolidated Group of Trusts which hold investment properties in Australia and New Zealand. The units in NSPT are stapled to the shares of National Storage Holdings Limited ("**NSH**") to form National Storage REIT ("**NSR**"). NSR is quoted on the Australian Securities Exchange ("**ASX**").

The Constitutions of NSH and NSPT ensure that, for so long as the two entities remain jointly quoted, the number of shares in NSH and the number of units in NSPT shall be equal and that the shareholders and unitholders be identical. The Responsible Entity of the Trust must at all times act in the best interest of NSPT. The stapling arrangement will continue until either the winding up of NSH or NSPT, or either entity terminates the stapling arrangements.

The Directors of National Storage Financial Services Limited as responsible entity of NSPT present their report together with the financial statements of National Storage Property Trust ("**the Group**") for the financial year ended 30 June 2021 ("**Reporting Period**").

# **DIRECTORS**

#### National Storage Financial Services Limited - the Responsible Entity

The Directors of the Responsible Entity in office during the Reporting Period and continuing as at the date of this Directors' Report are set out below.

Laurence Brindle Director
Andrew Catsoulis Director
Anthony Keane Director
Howard Brenchley Director
Steven Leigh Director
Claire Fidler Director

#### **PRINCIPAL ACTIVITIES**

NSPT and its sub trusts hold investment properties in Australia and New Zealand for the purpose of earning rental returns and generating capital growth.

# **REVIEW AND RESULTS OF OPERATIONS**

The Financial Statements are prepared in compliance with Australian Accounting Standards. Users of the financial information should familiarise themselves with the Corporate Information and Basis of Preparation in Notes 1 and 2 in the Financial Statements.

#### Operating results

For the year ended 30 June 2021, total revenue increased by 13% to \$100.1m (30 June 2020: \$88.2m) through increased rental income from investment properties acquired during the current and prior years. Profit after tax increased by 139% to \$306.0m (30 June 2020: \$127.8m) impacted by an increase in fair value gains on investment properties by \$165.2m to \$243.5m (30 June 2020: \$78.3m).

#### Capital management

Cash and cash equivalents as at 30 June 2021 were \$22.4m (30 June 2020: \$72.0m). Net operating cashflow for the year increased by \$13.4m to \$94.6m (30 June 2020: \$81.2m).

During the year NSR successfully raised \$325.5m of capital via institutional placements and security purchase plans. \$297.9m of equity was attributed to the Group. The purpose of the equity raisings was to execute acquisition opportunities and strengthen the NSR balance sheet.

# **DIRECTORS' REPORT**

An interim distribution of 4.0 cents per stapled security (\$40.7m) was paid on 1 March 2021 with an estimated final distribution of 4.2 cents per stapled security (\$49.7m) declared on 23 June 2021 with a payment date of 3 September 2021.

During the period NSR continued to offer a Distribution Reinvestment Plan ("**DRP**") enabling eligible unit holders to receive part or all of their distribution by way of units rather than cash.

For the December 2020 interim distribution 12% of eligible securityholders (by number of securities) elected to receive their distributions as securities. This raised equity of \$4.9m from the issue of 2,641,947 stapled securities of which \$4.5m was attributed to the Group.

The June 2021 final distribution has seen approximately 23% of eligible securityholders (by number of securities) elect to receive their distributions as securities totalling approximately \$11.5 million. The DRP price was set at \$2.1925 which resulted in approximately 5,200,000 new securities being issued of which \$10.6m will be attributable to the Group.

The Group is a party to NSR's finance facilities. NSR continues to actively manage its debt facilities to ensure it has adequate capacity for future acquisitions and working capital requirements. NSR's finance facilities are structured on a "Club" arrangement involving the four major Australian banks, a major Australian superannuation fund and JP Morgan, providing diversity of the funding group.

During the Reporting Period, NSR refinanced part of the existing debt facilities, and increased available liquidity by a further AUD \$100m and NZD \$25m, to support ongoing developments in Australia and New Zealand. NSR's borrowing facilities are AUD \$930m and NZD \$252m. As at the Reporting Date AUD equivalent of approximately \$403m was undrawn and available.

NSR maintains interest rate hedges in accordance with NSR's hedging policy. This hedging policy is reviewed on a regular basis. As at the Reporting Date interest rate hedges totalling \$432m were in place with expiry dates ranging from 0.25 years to 5.25 years.

#### Acquisitions and revaluation of investment properties

NSR considers its ability to acquire and integrate quality assets as a key driver of its growth strategy. During the course of the Reporting Period, the dedicated acquisitions team continued to identify, facilitate and transact on acquisitions that were considered appropriate for the portfolio.

In the year ended 30 June 2021, the Group acquired 22 new centres and 3 development sites for approximately \$352m. The Group re-values all assets each Reporting Period through a combined process undertaken by both external valuers and NSR's Directors based on valuations and methodologies from independent valuers. During this process the weighted average primary capitalisation rate reduced 51 basis points to 5.98% and the value of the 30 June 2020 portfolio increased by \$178 million.

#### SIGNIFICANT EVENTS AFTER BALANCE SHEET DATE

For the period from 1 July 2021 to the date of this report the Group settled two storage centre investment properties for a total cost of \$21m, and one development site for NZD \$3m (AUD \$2.8m). An additional storage centre is under contract for NZD \$10.1m (AUD \$9.4m) and is due to settle in late August 2021.

#### **ROUNDING**

The amounts contained in this report and in the financial report have been rounded to the nearest \$1,000 (unless otherwise stated) under the option available under ASIC Corporations (Rounding in Financial / Directors' Reports) Instrument 2016/191. The Group is an entity to which the class order applies.

# **DIRECTORS' REPORT**

# **AUDITOR'S INDEPENDENCE DECLARATION**

A copy of the auditor's independence declaration as required under Section 307C of the Corporations Act 2001 is set out on page 7.

#### FEES PAID TO AND INTERESTS HELD IN NSPT BY THE RESPONSIBLE ENTITY OR ITS ASSOCIATES

Fees paid to the Responsible Entity and its associates from NSPT during the year are disclosed in the Statement of Comprehensive Income and are detailed in note 16 to the financial statements.

No fees were paid to the Directors of the Responsible Entity during the year out of NSPT.

This report is made on 24 August 2021 in accordance with a resolution of the Responsible Entity and is signed for and on behalf of the Responsible Entity.

# Auditor's Independence Declaration to the Directors of National Storage Financial Services Limited as responsible entity of National Storage Property Trust and its controlled entities

As lead auditor for the audit of the financial report of National Storage Property Trust and its controlled entities for the financial year ended 30 June 2021, I declare to the best of my knowledge and belief, there have been:

- a. No contraventions of the auditor independence requirements of the *Corporations Act 2001* in relation to the audit; and
- b. No contraventions of any applicable code of professional conduct in relation to the audit.

This declaration is in respect of National Storage Property Trust and the entities it controlled during the financial year.

Cash and cash equivalents at 30 June	8.1	22,379	71,966

# **NOTES TO THE FINANCIAL STATEMENTS**

For the year ended 30 June 2021

#### CORPORATE INFORMATION

The Group is a Consolidated Group of Trusts which hold investment properties in Australia and New Zealand. The units in NSPT are stapled to the shares of National Storage Holdings Limited ("**NSH**") to form National Storage REIT ("**NSR**"). NSR is quoted on the Australian Securities Exchange ("**ASX**").

The Constitutions of NSH and NSPT ensure that, for so long as the two entities remain jointly quoted, the number of shares in NSH and the number of units in NSPT shall be equal and that the shareholders and unitholders be identical. The Responsible Entity of the Trust must at all times act in the best interest of NSPT. The stapling arrangement will continue until either the winding up of NSH or NSPT, or either entity terminates the stapling arrangements.

The financial report of Group for the year ended 30 June 2021 was approved on 24 August 2021, in accordance with a resolution of the Directors the Responsible Entity.

The nature of the operations and principal activities of the Group are described in the Directors' Report.

#### 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

#### (a) Basis of preparation

These general purpose financial statements have been prepared in accordance with Australian Accounting Standards and Interpretations issued by the Australian Accounting Standards Board ("AASB") and the Corporations Act 2001. The financial statements have been prepared on a historical cost basis, except for selected non-current assets, financial assets and financial liabilities for which the fair value basis of accounting has been applied. NSPT is a for-profit entity for the purpose of preparing the financial statements.

The financial statements are presented in Australian Dollars ("**AUD**") and all values are rounded to the nearest thousand dollars (\$'000) unless otherwise stated.

The accounting policies applied by NSPT in these financial statements are the same as the 30 June 2020 financial statements except for the accounting policies impacted by new or amended accounting standards detailed in this note.

The Group has elected to present only financial information relating to the Group within these financial statements. A separate financial report for NSR has also been prepared for the year ended 30 June 2021, this is available at <a href="https://www.nationalstorageinvest.com.au">www.nationalstorageinvest.com.au</a>.

#### Deficiency of net current assets

As at 30 June 2021, the Group had an excess of current liabilities over current assets of \$21.1m. At 30 June 2021, the Group had \$16.0m of related party receivables due from the NSH Group, a related party. The Group maintains the option of receiving payment for these amounts should this be required to manage the Group's cash flow requirements. The Group generated strong operating cash flows of \$94.6m for the year ended 30 June 2021 and has available funding facilities beyond a year of \$403m (see note 8.5).

The financial report has been prepared on a going concern basis as the Directors of The Responsible Entity believe the Group will continue to generate operating cash flows to meet all payment obligations in the ordinary course of business.

# (b) Compliance with IFRS

The consolidated financial statements of the Group comply with International Financial Reporting Standards ("**IFRS**") as issued by the International Accounting Standards Board.

# (c) Changes in accounting policy, disclosures, standards and interpretations

The Group has adopted all of the new and revised Standards and Interpretations issued by the AASB that are relevant to its operations and effective for the current year.

#### Other standards, amendments and interpretations

The Group adopted AASB 2018-6 Amendments to Australian Accounting Standards – Definition of a Business from 1 July 2018 as detailed in note 2(g). Several other amendments and interpretations apply for the first time in the reporting period, but do not have a material impact on the consolidated financial report of the Group. The Group has not early adopted any other standards.

# Accounting standards and interpretations issued but not yet effective

Australian Accounting Standards and Interpretations relevant to the Group's operations, that have recently been issued or amended but are not yet effective or have not been adopted for the annual reporting period ended 30 June 2021 are outlined in the following table:

Reference	Title	Summary and impact on Group financial report	Application date of standard	Application date for Group
AASB 2019-3	Amendments to Australian Accounting Standards (AASs) – Interest Rate Benchmark Reform	Interbank offered rates (IBOR) are benchmark interest rates referenced in financial products.  Examples include:  • A loan that incurs interest quarterly at 3-month LIBOR plus a margin;  • An interest rate swap involving the exchange of fixed-rate monthly interest payments for variable interest payments based on monthly BBSW plus a margin.  Addressing the financial reporting effects of IBOR reform comes in two phases.  The first phase deals with issues affecting financial reporting before the replacement of existing interest rate benchmarks. It introduces amendments to AASB 7, AASB 9, and AASB 139, providing mandatory temporary relief enabling hedge accounting to continue during the period of uncertainty before existing interest rate benchmarks are replaced with alternatives.  The second phase focuses on issues that may affect financial reporting on replacement of existing interest rate benchmarks, and amends the requirements in AASB 9, AASB 139, AASB 7, AASB 4, and AASB 16. The objective of the amendments is to minimise financial reporting consequences of a change in benchmark interest rates that may otherwise be required, such as the derecognition or remeasurement of	1 January 2021	1 July 2021

		financial instruments, and the discontinuation of hedge accounting.		
AASB 2020-3	Amendment to AASB 9 – Fees in the '10 per cent' Test for Derecognition of Financial Liabilities (Part of Annual Improvements 2018–2020 Cycle)	Under AASB 9, an existing financial liability that has been modified or exchanged is considered extinguished when the contractual terms of the new liability are substantially different, measured by when the present value of the cash flows under the new terms, including any fees paid or received, is at least 10 per cent different from the present value of the remaining cash flows of the original financial liability.  The amendment to AASB 9 clarifies that	1 January 2022	1 July 2022
		fees included in the test are limited to fees paid or received between the borrower and the lender, including amounts paid or received by them on the other's behalf.		
AASB 2014-10	Amendments to Australian Accounting Standards – Sale or Contribution of Assets between an Investor and its Associate or Joint Venture	AASB 2014-10 amends AASB 10 Consolidated Financial Statements and AASB 128 Investments in Associates and Joint Ventures to address an inconsistency between the requirements in AASB 10 and those in AASB 128, in dealing with the sale or contribution of assets between an investor and its associate or joint venture.	1 January 2022	1 July 2022
AASB 2020-1	Amendments to AASs – Classification of Liabilities as Current or Non- current	A liability is classified as current if the entity has no right at the end of the reporting period to defer settlement for at least 12 months after the reporting period. The AASB recently issued amendments to AASB 101 Presentation of Financial Statements to clarify the requirements for classifying liabilities as current or non-current.  The amendments specify that the	1 January 2023	1 July 2023
		conditions which exist at the end of the reporting period are those which will be used to determine if a right to defer settlement of a liability exists.  Management intention or expectation does not affect classification of liabilities.		
AASB 2021-2	Amendments to AASB 108 – Definition of Accounting Estimates	An accounting policy may require items in the financial statements to be measured using information that is either directly observable, or estimated. Accounting estimates use inputs and measurement techniques that require judgements and assumptions based on the latest available, reliable information.	1 January 2023	1 July 2023
		The amendments to AASB 108 clarify the definition of an accounting estimate, making it easier to differentiate it from an accounting policy.		
		The new definition provides that 'Accounting estimates are monetary amounts in financial statements that are		

subject to measurement uncertainty.' The amendments explain that a change in an input or a measurement technique used to develop an accounting estimate is considered a change in an accounting estimate unless it is correcting a prior period error.

For example, a change in a valuation technique used to measure the fair value.

For example, a change in a valuation technique used to measure the fair value of an investment property from market approach to income approach would be treated as a change in estimate rather than a change in accounting policy.

In contrast, a change in an underlying measurement objective, such as changing the measurement basis of investment property from cost to fair value, would be treated as a change in accounting policy.

AASB 2021-5

Amendments to AASs – Deferred Tax related to Assets and Liabilities arising from a Single Transaction AASB 112 Income Taxes requires entities to account for income tax consequences when economic transactions take place, and not at the time when income tax payments or recoveries are made.

Entities need to consider the differences between the tax rules and the accounting standards. These differences could either be:

- Permanent e.g. when tax rules do not allow a certain expense to ever be deducted; or
- Temporary e.g. when tax rules treat an item of income as taxable in a period later than when included in the accounting profit.

Deferred taxes representing amounts of income tax payable or recoverable in the future must be recognised on temporary differences unless prohibited by AASB 112 in certain circumstances.

One of these circumstances, known as the initial recognition exception, applies when a transaction affects neither accounting profit nor taxable profit, and is not a business combination.

The amendments to AASB 112 have narrowed the scope of this exception such that it no longer applies to transactions that, on initial recognition, give rise to equal amounts of taxable and deductible temporary differences.

Entities are required to recognise deferred tax for all temporary differences related to leases, restoration and similar liabilities at the beginning of the earliest comparative period presented.

1 January 2023 1 July 2023

#### (d) Basis of consolidation

The consolidated financial statements of NSPT as at 30 June 2021 comprises the consolidated group consisting of the parent entity and subtrusts.

#### **Subsidiaries**

Subsidiaries are all entities over which the Group has control. The Group controls an entity when it is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through the power to direct the activities of the entity. Consolidation of a subsidiary begins when the Group obtains control over the subsidiary and ceases when the Group loses control. The acquisition method of accounting is used to account for business combinations (see note 2 (g)).

Intercompany transactions, balances and unrealised gains on transactions between group entities are eliminated. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the transferred asset. Accounting policies of all subsidiaries are consistent with the policies adopted by the Group.

The Group treats transactions with non-controlling interests that do not result in a loss of control as transactions with equity owners of the Group. A change in ownership interest results in an adjustment between the carrying amounts of the controlling and non-controlling interests to reflect their relative interests in the subsidiary.

Any difference between the amount of the adjustment to non-controlling interests and any consideration paid or received is recognised in a separate reserve within equity attributable to owners of the parent entity.

#### Associates

Associates are all entities over which the Group has significant influence but not control or joint control. This is generally the case where the Group holds between 20% and 50% of the voting rights. Investments in associates are accounted for using the equity method.

#### Joint arrangements

Under AASB 11 Joint Arrangements, investments in joint arrangements are classified as either joint operations or joint ventures. The classification depends on the contractual rights and

obligations of each investor, rather than the legal structure of the joint arrangement.

Investments in joint ventures are accounted for using the equity method.

#### Equity method

Under the equity method, the investment in an associate or a joint venture is initially recognised at cost. The carrying amount of the investment is adjusted to recognise changes in the Group's share of net assets since the acquisition date. Goodwill relating to the associate or joint venture is included in the carrying amount of the investment and is neither amortised nor individually tested for impairment.

The statement of profit or loss reflects the Group's share of the results of operations of the associate or joint venture. Any change in other comprehensive income of those investees is presented as part of the Group's other comprehensive income. In addition, when there has been a change recognised directly in the equity of the associate or joint venture, the

Group recognises its share of any changes, when applicable, in the statement of changes in equity. Unrealised gains and losses resulting from transactions between the Group and the associate or joint venture are eliminated to the extent of the interest in the associate or joint venture.

The aggregate of the Group's share of profit or loss from joint ventures is shown on the face of the consolidated statement of profit or loss. This represents profit or loss after tax and non-controlling interests in the subsidiaries of joint ventures.

The financial statements of joint ventures are prepared for the same reporting period as the Group. When necessary, adjustments are made to bring the accounting policies in line with those of the Group.

After application of the equity method, the Group determines whether it is necessary to recognise an impairment loss on its investment in its joint ventures. At each reporting date, the Group determines whether there is objective evidence that the investment in the associate or joint venture is impaired. If there is such evidence, the Group calculates the amount of impairment as the difference between the recoverable amount of the associate or joint venture and its carrying value, then recognises

the loss as 'Share of profit or loss of joint venture' in the consolidated statement of profit or loss. Upon loss of significant influence over an associate or joint control over the joint venture, the Group measures and recognises any retained investment at its fair value. Any difference between the carrying amount of the associate or joint venture upon loss of significant influence or joint control and the fair value of the retained investment and proceeds from disposal is recognised in profit or loss.

#### (e) Revenue recognition

Revenue is recognised under AASB 15 Revenue from Contracts with Customers and applies to all revenue from contracts with customers, unless those contracts are in the scope of other standards.

The Group follows a five-step model to account for revenue arising from contracts with customers. Revenue is recognised at an amount that reflects the consideration to which an entity expects to be entitled to, in exchange for transferring goods or services to a customer. The Group exercises judgement, taking into consideration all of the relevant facts and circumstances when applying each step of the model to contracts with their customers.

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the Group and the revenue can be reliably measured, regardless of when the payment is received. Revenue is measured at the fair value of the consideration received or receivable, taking into account contractually defined terms of payment and excluding taxes or duty.

The Group assesses its revenue arrangements against specific criteria to determine if it is acting as principal or agent. The specific recognition criteria described below must also be met before revenue is recognised.

The Group's revenue is disaggregated at the statement of profit or loss with the exception of Revenue from Contracts with Customers which is disaggregated into categories in note 5 that depict how the nature, amount, timing and uncertainty of revenue and cash flows are affected by economic factors.

Revenue from rental income Revenue from rental income relating to the provision of storage space and commercial units is recognised less any amount contractually refundable to customers over the term of the general agreement. The value of discounts offered to customers at the end of an incentive period is recognised over the expected rental period.

Design and development fees
The Group's design and development fees to
customers consist of one performance
obligation. The Group recognises revenue from
design and development fees over the relevant
period of the performance obligations as the
Group's performance creates or enhances an
asset that the customer controls.

#### Interest income

Interest income is recognised using the effective interest method. When a receivable is impaired, the Group reduces the carrying amount to its recoverable amount, being the estimated future cash flow discounted at the original effective interest rate of the instrument and continues unwinding the discount as interest income. Interest income on impaired loans is recognised using the original effective interest rate.

#### (f) Taxes

The Group comprises taxable and non-taxable entities. A liability for current and deferred tax expense is only recognised in respect of taxable entities that are subject to income tax.

NSPT is a 'flow through' entity for Australian income tax purposes and is an Attribution Managed Investment Trust, such that the determined tax components of NSPT will be taxable in the hands of unitholders on an attribution basis.

NSPT's subsidiary National Storage New Zealand Property Trust ("**NSNZPT**") is an Australian registered trust which owns investment property in New Zealand. For New Zealand tax purposes NSNZPT is classed as a unit trust and is subject to New Zealand income tax.

#### Current income tax

Current income tax assets and liabilities are measured at the amount expected to be recovered or paid to the taxation authorities. The tax rates and laws used to compute the amount are those that are enacted or substantively enacted at the reporting date in the countries where the Group operates and generates taxable income.

Current income tax relating to items recognised directly in equity is recognised in equity and not in the statement of profit or loss.

Management periodically evaluates tax positions where the interpretation of applicable tax regulations is subjective and establishes provisions where appropriate.

#### Deferred tax

Deferred tax is provided using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date.

Deferred tax assets and liabilities are recognised for all deductible or taxable temporary differences, except:

- When the deferred tax asset or liability arises from the initial recognition of goodwill or an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss.
- In respect of deductible or taxable temporary differences associated with investments in subsidiaries, associates and interest in joint arrangements, when the timing of the reversal of temporary differences can be controlled and it is probable that the temporary difference will not reverse in the foreseeable future, and in the case of deferred tax assets taxable profit will be available against which the temporary differences can be utilised.

The deferred tax liabilities in relation to investment property is recognised dependent upon the taxable impact in the relevant jurisdiction. The Group assumes that the current measurement at fair value will be recovered entirely through a sale.

In New Zealand, as any capital gain on sale will generally be exempt from tax, the deferred tax liability in relation to these assets would generally be calculated based on the amount of any tax depreciation recovery.

Deferred tax assets are also recognised relating to the carry forward of unused tax credits and unused tax losses to the extent that it is probable that taxable profit will be available against which the deductible temporary differences,

and the carry forward of unused tax credits and unused tax losses can be utilised,

The carrying amount of deferred tax assets is reviewed at each reporting date and adjusted to the extent that it is probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised.

Goods and services tax ("GST")
Revenue, expenses, assets, and liabilities are recognised net of the amount of GST, except:

- When the GST incurred on a sale or purchase of assets is not payable or recoverable from the taxation authority, in which case the GST is recognised as part of the revenue or expense item or part of the cost of acquisition of the asset, as applicable.
- When receivables and payables are stated with the amount of GST included.

The net amount of GST recoverable from, or payable to, the taxation authority is included as part of receivables or payables in the statement of financial position. Commitments and contingencies are disclosed net of the amount of GST recoverable from, or payable to, the taxation authority.

Cash flows are included in the statement of cash flows on a gross basis and the GST component of cash flows arising from investing and financing activities, which is recoverable from, or payable to, the taxation authority is classed as part of operating cash flows.

#### (g) Foreign currencies

The Group's consolidated financial statements are presented in Australian dollars. For each entity, the Group determines the functional currency and items included in the financial statements of each entity are measured using that functional currency.

#### Transactions and balances

Transactions in foreign currencies are initially recorded by the Group's entities at their respective functional currency spot rates at the date the transaction first qualifies for recognition. Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency spot rates of exchange at the reporting date.

Differences arising on settlement or translation of monetary items are recognised in profit or loss with the exception of monetary items that are designated as part of the hedge of the Group's net investment of a foreign operation. These are recognised in other comprehensive income until the net investment is disposed of, at which time, the cumulative amount is reclassified to profit or loss. Tax charges and credits attributable to exchange differences on those monetary items are also recorded in other comprehensive income.

Non-monetary items that are measured at historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value is determined.

The gain or loss arising on translation of nonmonetary items measured at fair value is treated in line with the recognition of the gain or loss on the change in fair value of the item (i.e. translation differences on items recognised in other comprehensive income or profit or loss are also recognised in other comprehensive income or profit or loss).

#### Group entities

On consolidation, the assets and liabilities of foreign operations are translated into Australian dollars at the rate of exchange prevailing at the reporting date and their statements of profit or loss are translated at exchange rates prevailing at the dates of the transactions. The exchange differences arising on translation for consolidation are recognised in other comprehensive income. On disposal of a foreign operation, the component of other comprehensive income relating to that particular foreign operation is recognised in profit or loss.

#### (h) Business combinations and goodwill

The Group accounts for a transaction as a business combination if it meets the definition under AASB 3, which requires the assets and liabilities acquired to constitute a business. A business is defined as an integrated set of activities and assets that are capable of being conducted and managed for the purpose of providing goods or services to customers, generating investment income (such as dividends or interest) or generating other

income from ordinary activities. In order to determine if these is an integrated set of activities, an assessment of minimum business requirements and what substantive processes have been acquired, is applied.

As part of this assessment the Group has applied the amendments to the definition of a business under AASB 2018-6 including the optional fair value concentration test. If the concentration test is passed, the set of activities and assets is determined not to be a business and therefore, the transaction is not accounted for as a business combination but rather as an asset acquisition.

Business combinations are accounted for using the acquisition method. The cost of an acquisition is measured as the aggregate of the consideration transferred, which is measured at acquisition date fair value, and the amount of any non-controlling interests in the acquiree. For each business combination, the Group elects whether to measure the non-controlling interests in the acquiree at fair value or at the proportionate share of the acquiree's identifiable net assets. Acquisition related costs are expensed as incurred and included in business combination expenses in the statement of profit or loss.

When the Group acquires a business, it assesses the financial assets and liabilities assumed for appropriate classification and designation in accordance with the contractual terms, economic circumstances and pertinent conditions as at the acquisition date. This includes the separation of embedded derivatives in host contracts by the acquiree.

Any contingent consideration to be transferred by the acquirer will be recognised at fair value at the acquisition date. Contingent consideration classified as an asset or liability that is a financial instrument and within the scope of AASB 9 Financial Instruments, is measured at fair value with the changes in fair value recognised in the statement of profit or loss.

Goodwill is initially measured at cost (being the excess of the aggregate of the consideration transferred and the amount recognised for non-controlling interests and any previous interest held over the net identifiable assets acquired and liabilities assumed). If the fair value of the net assets acquired exceeds the aggregate consideration transferred, the Group re-assesses

whether it has correctly identified all assets acquired and liabilities assumed and reviews the procedures used to measure the amounts to be recognised at the acquisition date. If the reassessment still results in an excess of the fair value of net assets acquired over the aggregate consideration transferred, then the gain is recognised in profit or loss.

After initial recognition, goodwill is measured at cost less any accumulated impairment losses. For the purpose of impairment testing, goodwill acquired in a business combination is, from the acquisition date, allocated to each of the Group's cash-generating units ("CGUs") that are expected to benefit from the combination, irrespective of whether other assets or liabilities of the acquiree are assigned to those units.

Where goodwill has been allocated to a CGU and part of the operation within that unit is disposed of, the goodwill associated with the disposed operation is included in the carrying amount of the operation when determining the gain or loss on disposal. Goodwill disposed in these circumstances is measured based on the relative values of the disposed operation and the portion of the CGU retained.

#### (i) Leases

The Group assesses at contract inception whether a contract is, or contains, a lease. That is, if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

#### Group as a lessor

Leases in which the Group does not transfer substantially all the risks and rewards incidental to ownership of an asset are classified as operating leases. Rental income arising is accounted for on a straight line basis over the lease terms and is included in revenue in the statement of profit or loss due to its operating nature. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised over the lease term on the same basis as rental income. Contingent rents are recognised as revenue in the period in which they are earned.

# (j) Cash and cash equivalents

Cash and cash equivalents in the statement of financial position comprise cash at bank, cash on hand and term deposits that are readily convertible to known amounts of cash and which are subject to an insignificant risk of change in value.

For the purposes of the statement of cash flows, cash and cash equivalents consist of cash and term deposits as defined above.

#### (k) Financial assets

#### Initial recognition and measurement

At initial recognition, financial assets are classified as subsequently measured at amortised cost, fair value through other comprehensive income, or fair value through profit or loss.

The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the Group's business model for managing them. The Group initially measures a financial asset at its fair value plus, in the case of financial assets, transaction costs.

Trade receivables that do not contain a significant financing component or for which the Group has applied the practical expedient are measured at the transaction price determined under AASB 15.

In order for a financial asset to be classified and measured at amortised cost or fair value through other comprehensive income, it needs to give rise to cash flows that are solely payments of principal and interest ("SPPI") on the principal amount outstanding. This assessment is referred to as the SPPI test and is performed at an instrument level.

The Group's business model for managing financial assets refers to how it manages its financial assets in order to generate cash flows. The business model determines whether cash flows will result from collecting contractual cash flows, selling the financial assets, or both.

#### Subsequent measurement

Financial assets at amortised cost
The Group measures financial assets at
amortised cost if the financial asset is held with
the objective to collect contractual cash flows
and the contractual terms of the financial asset
give rise on specified dates to cash flows that
are solely payments of principal and interest on
the principal amount outstanding.

Financial assets held at amortised cost are subsequently measured using the effective interest method and are subject to impairment. Gains and losses are recognised in profit or loss when the asset is derecognised, modified or impaired. The Group's financial assets at amortised cost includes trade and other receivables, and deposits.

Financial assets at fair value through other comprehensive income

The Group measures debt instruments at fair value through other comprehensive income if the financial asset is held with the objective of both holding to collect contractual cash flows and sale, and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

For debt instruments at fair value through other comprehensive income, interest income, foreign exchange revaluation and impairment losses or reversals are recognised in the statement of profit or loss and computed in the same manner as financial assets measured at amortised cost. The remaining fair value changes are recognised in other comprehensive income. Upon derecognition, the cumulative fair value change recognised in other comprehensive income is recycled to profit or loss.

Financial assets at fair value through profit or loss This category includes financial assets held for trading and financial assets designated upon initial recognition at fair value through profit or loss. Financial assets are classified as held for trading if they are acquired for the purpose of selling or repurchasing in the near term.

Derivatives, including separated embedded derivatives are also classified as held for trading unless they are designated as effective hedging instruments. Financial assets at fair value through profit or loss are carried in the statement of financial position at fair value with net changes in fair value recognised in the statement of profit or loss.

#### Derecognition

Financial assets are derecognised when the rights to receive cash flows from the assets have expired and the Group has transferred substantially all the risks and rewards of ownership or control of the asset.

#### **Impairment**

The Group uses AASB 9's incurred loss approach with a forward-looking expected credit loss ("ECL") methodology to recognise an ECL for all debt instruments not held at fair value through profit or loss. ECLs are based on the difference between the contractual cash flows due in accordance with the contract and all the cash flows that the Group expects to receive, discounted at an approximation of the original effective interest rate. The expected cash flows will include cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms.

ECLs are recognised in two stages. For credit exposures for which there has not been a significant increase in credit risk since initial recognition, ECLs are provided for credit losses that result from default events that are possible within the next 12-months.

For those credit exposures for which there has been a significant increase in credit risk since initial recognition, a loss allowance is required for credit losses expected over the remaining life of the exposure, irrespective of the timing of the default.

For trade receivables and contract assets, the Group applies a simplified approach in calculating ECLs. Therefore, the Group does not track changes in credit risk, but instead recognises a loss allowance based on lifetime ECLs at each reporting date. The Group assesses this allowance based on its historical credit loss experience, adjusted for forward-looking factors specific to the debtors.

The Group considers a financial asset to be at risk of default when contractual payments are 90 days past due. However, in certain cases, the Group may also consider a financial asset to be in default when internal or external information indicates that the Group is unlikely to receive the outstanding contractual amounts in full before taking into account any credit enhancements held by the Group.

A financial asset is written off when there is no reasonable expectation of recovering the contractual cash flows.

#### (I) Financial liabilities

#### Initial recognition and measurement

Financial liabilities are classified at initial recognition as financial liabilities at fair value through profit or loss, loans and borrowings, payables, or as derivatives designated as hedging instruments in an effective hedge.

All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs. The Group's financial liabilities include trade and other payables, loans and borrowings, and derivative financial instruments.

#### Subsequent measurement

Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss include financial liabilities held for trading and financial liabilities designated upon initial recognition at fair value through profit or loss.

Financial liabilities at fair value through profit or loss are designated at the initial date of recognition only if the criteria in AASB 9 are satisfied. The Group has not designated any financial liability at fair value through profit or loss.

#### Loans and borrowings

After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost. Any difference between the proceeds (net of transaction costs) and the redemption amount is recognised in profit or loss over the period of the borrowings using the effective interest method.

Fees paid on the establishment of loan facilities are capitalised as transaction costs of the loan and subsequently amortised over the period of the facility to which it relates.

Borrowing costs are recognised as an expense when incurred unless they relate to the acquisition, construction or production of a qualifying asset or to upfront borrowing establishment and arrangement costs, which are deferred and amortised as an expense over the life of the facility. Borrowing costs incurred for the construction of any qualifying asset are capitalised during the period of time that is required to complete the asset for its intended use or sale.

#### **Derecognition**

A financial liability is derecognised when the obligation under the liability is discharged, cancelled or expired. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, this is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the statement of profit or loss.

Borrowings are classified as current liabilities unless the group has an unconditional right to defer settlement of the liability for at least 12 months after the reporting period.

# (m) Derivative financial instruments and hedge accounting

#### Initial recognition and measurement

The Group uses derivative financial instruments, such as interest rate swaps, forward currency exchange contracts and a net investment hedge to hedge its foreign currency and interest rate risks.

Derivatives are initially recognised at fair value on the date a derivative contract is entered into and are subsequently remeasured to fair value at the end of each reporting period.

The accounting for subsequent changes in fair value depends on whether the derivative is designated as a hedging instrument, and if so, the nature of the item being hedged. The Group designates certain derivatives as either:

- Hedges of the fair value of recognised assets or liabilities or a firm commitment (fair value hedges);
- Hedges of a particular risk associated with the cash flows of recognised assets and liabilities and highly probable forecast transactions (cash flow hedges); or
- Hedges of a net investment in a foreign operation (net investment hedges).

At the inception of a hedge relationship, the Group formally designates and documents the hedge relationship to which it wishes to apply hedge accounting and the risk management objective and strategy for undertaking the hedge.

For hedges that were initially entered into prior to 1 July 2018, the documentation includes identification of the hedging instrument, the hedged item or transaction, the nature of the risk being hedged and how the Group will assess the effectiveness of changes in the hedging instrument's fair value in offsetting the exposure to changes in the hedged item's fair value or cash attributable to the hedged risk. Such hedges are expected to be highly effective in achieving offsetting changes in fair value or cash flows and are assessed on an ongoing basis to determine if they have been highly effective throughout the financial reporting periods for which they were designated.

From 1 July 2018, the documentation includes identification of the hedging instrument, the hedged item, the nature of the risk being hedged and how the Group will assess whether the hedging relationship meets the hedge effectiveness requirements (including the analysis of sources of hedge ineffectiveness and how the hedge ratio is determined). A hedging relationship qualifies for hedge accounting if it meets all of the following effectiveness requirements:

- There is 'an economic relationship' between the hedged item and the hedging instrument.
- The effect of credit risk does not 'dominate the value changes' that result from that economic relationship.
- The hedge ratio of the hedging relationship is the same as that resulting from the quantity of the hedged item that the Group actually hedges and the quantity of the hedging instrument that the Group actually uses to hedge that quantity of hedged item.

The fair values of various derivative financial instruments used for hedging purposes are disclosed in note 8.8. Movements in the hedging reserve in equity are shown in note 13. The full fair value of a hedging derivative is classified as either a current or non-current asset or liability dependent upon if remaining maturity of the hedged item is less than or greater than 12 months. Trading derivatives are classified as a current asset or liability.

#### Cash flow hedge

The effective portion of changes in the fair value of derivatives that are designated and qualify as a cash flow hedge is recognised in other comprehensive income and accumulated in reserves in equity. The gain or loss relating to the ineffective portion is recognised immediately in

profit or loss within interest income and finance costs.

The Group uses forward currency contracts as hedges of its exposure to foreign currency risk in forecast transactions. The ineffective portion relating to foreign currency contracts is recognised as other operational expenses.

The Group designates only the spot element of forward contracts as a hedging instrument. The forward element is recognised in other comprehensive income and accumulated in a separate component of equity within the hedging reserve.

The amounts accumulated in other comprehensive income are accounted for depending on the nature of the underlying hedged transaction. These amounts are reclassified to profit or loss as a reclassification adjustment in the same period or periods during which the hedged cash flows affect profit or loss.

If cash flow hedge accounting is discontinued, the amount that has been accumulated in other comprehensive income must remain in other comprehensive income if the hedged future cash flows are still expected to occur. Otherwise, the amount will be immediately reclassified to profit or loss as a reclassification adjustment. After discontinuation, once the hedged cash flow occurs, any accumulated amount remaining in other comprehensive income must be accounted for depending on the nature of the underlying transaction.

Hedges of a net investment
Hedges of a net investment in a foreign
operation, including a hedge of a monetary
item that is accounted for as part of the net
investment, are accounted for in a similar way
to cash flow hedges. Gains or losses on the
hedging instrument relating to the effective
portion of the hedge are recognised as other
comprehensive income while any gains or losses
relating to the ineffective portion are
recognised in the statement of profit or loss. On
disposal of the foreign operation, the
cumulative value of any such gains or losses
recorded in equity is transferred to the
statement of profit or loss.

#### (n) Investment properties

#### Investment properties

Investment properties are measured initially at cost, including transaction costs. Subsequent to initial recognition, investment properties are

stated at fair value, which reflects market conditions at the reporting date.

Gains or losses arising from changes in the fair values of investment properties are included in profit or loss in the period in which they arise.

Fair values are determined by a combination of independent valuations and Director valuations. The independent valuations are performed by an accredited independent valuer. Investment properties are independently valued on a rotational basis, every three years, unless required by the underlying financing or the Directors determine a more frequent valuation cycle.

For properties subject to an independent valuation, the Directors verify all major inputs to the valuation and review the results with the independent valuer.

The Responsible Entity has outsourced completion of the Director valuations to the NSH Group Board under a management agreement. The valuations are determined using the same techniques and similar estimates to those applied by the independent valuer.

In some transactions involving the purchase of a group of assets the value assessed by NSR, being the purchase price paid, may exceed the sum of the independent property valuations which are undertaken on a stand-alone property basis. This excess in value represents a portfolio premium.

Any portfolio premium attributable to the investment property assets acquired in transactions accounted for as asset acquisition is allocated to the individual identifiable assets acquired within each portfolio on the relative fair value basis at the date of acquisition

Investment properties are derecognised either when they have been disposed of or when they are permanently withdrawn from use and no future economic benefit is expected from their disposal. The difference between the net disposal proceeds and the carrying amount of the asset is recognised in the statement of profit or loss in the period of derecognition. Transfers are made to or from investment property only when there is a change in use.

# (o) Impairment of assets

Non-financial assets are tested for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable.

An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs of disposal and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash inflows which are largely independent of the cash inflows from other assets or groups of assets (CGU's). Non-financial assets other than goodwill that have been impaired in previous periods are reviewed for possible reversal of the impairment at the end of each reporting period.

# (p) Contributed equity

Units are classified as equity. Issued and paid up capital is recognised at the fair value of the consideration received by the Group. Incremental costs directly attributable to the issue of securities are shown in equity as a deduction, net of tax, from the proceeds.

#### (q) Distribution to unitholders

The Group recognises a liability to make cash or non-cash distributions to equity holders when the distribution is authorised and is no longer at the discretion of the Company or the Responsible Entity. A corresponding amount is recognised directly in equity.

Non-cash distributions are measured at the fair value of the assets to be distributed with fair value re-measurement recognised directly in equity. Any difference between the carrying amount of the liability and the carrying amount of the assets distributed is recognised in the statement of profit or loss.

#### (r) Rounding of amounts

The Group is of a kind referred to in ASIC Corporations (Rounding in Financial/Directors' Reports) Instrument 2016/191, relating to the 'rounding off' of amounts in the financial statements.

Amounts in the financial statements have been rounded off to the nearest thousand dollars, or in certain cases, the nearest dollar.

# (s) Parent entity financial information

The financial information for the parent entity, NSPT, disclosed in note 20 has been prepared on the same basis as the consolidated financial statements, except in relation to investments in subsidiaries which are accounted for at cost in the financial statements of NSPT.

#### (t) Fair value measurement

The Group measures financial instruments, such as derivatives, and non-financial assets such as investment properties, at fair value at each balance sheet date.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability; or
- In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible by the group.

The fair value of an asset or liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest. A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant.

The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data is available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2 Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- Level 3 Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognised in the financial statements on a recurring basis, the Group determines whether transfers have occurred between levels in the hierarchy by reassessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

For further details on fair value measurement refer to notes 8.8 and 9.3.

# 3. SIGNIFICANT ACCOUNTING JUDGEMENTS, ESTIMATES AND ASSUMPTIONS

The preparation of the Group's consolidated financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying disclosures, and the disclosure of contingent assets and liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of the assets or liabilities affected in future periods.

Other disclosures relating to the Group's exposure to risks and uncertainties include:

- Capital management (note 15)
- Financial instruments risk management and policies (notes 8.8, 14)
- Sensitivity analyses disclosures (notes 9.3, 14).

#### **Judgements**

In the process of applying the Group's accounting policies, management has made the following judgements, which have a significant effect on the amounts recognised in the consolidated financial statements:

Significant judgements

Acquisition of storage centre assets
For the acquisition of storage centres, the
Group's policy is to review the nature of the
transaction and assess if the transaction should
be accounted for under AASB 3 Business
Combinations or AASB 140 Investment Properties
as a purchase of investment property. The key
assessment is whether the transaction
constitutes a purchase of a 'business', and if so,
it will be accounted for under AASB 3. If it is
determined that the transaction does not meet
this definition, the transaction is accounted for
as a purchase of an asset under AASB 140, as an
acquisition of a storage centre(s) held for rental
return and capital appreciation.

As described in note 2c, the Group has applied the amendments to a definition of a business contained in AASB 2018-6. This provides clarity on what is considered as a business and adds an optional concentration test that simplifies the assessment of whether an acquired set of activities and assets is not a business.

For the years ended 30 June 2021 and 30 June 2020, the Group has assessed that all of its storage centre acquisitions do not meet the definitions set out in AASB 3 and are therefore accounted for as purchases of investment property per AASB 140.

Property lease classification – Group as lessor The Group has entered into commercial property leases on its investment property portfolio. The Group has determined, based on an evaluation of the terms and conditions of the arrangements that it retains substantially all the risks and rewards incidental to ownership of these properties and accounts for the contracts as operating leases.

Classification of joint arrangements
The Group holds a 25% interest in the Bundall
Storage Trust. Under this arrangement,
investments are classified as joint ventures as all
parties are subject to a Securityholders
Agreement that has been contractually
structured such that the parties to the
agreement have equal representation on the
advisory board responsible for the overall
direction and supervision of the trust, and
whereby, decisions about the relevant activities
require the unanimous consent of the parties
sharing control.

# **Estimates and assumptions**

The key assumptions at the reporting date concerning the future, and other key sources of estimation uncertainty, that have significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below.

Assumptions and estimates are based on parameters available when the consolidated financial statements were prepared. Existing circumstances and assumptions about the future developments may change due to market changes or circumstances arising beyond the control of the Group. Such changes are reflected in the assumptions when they occur.

Revaluation of investment properties
The Group carries its investment properties at fair
value, with changes in fair value being
recognised in the statement of profit or loss
under fair value adjustments. Fair values of
individual properties are determined by a
combination of independent valuations
assessed on a rotational basis and annual

Directors' valuations, determined using the same techniques and similar estimates to those applied by the independent valuer.

The capitalisation of net operating income approach to investment property valuations is applied by both the external and Directors' valuations. This is a commonly applied valuation method for storage facilities within Australia and New Zealand. This methodology is generally used in sectors where revenue is earned from short term rentals or an operating activity as opposed to a fixed long-term rental lease.

The Group calculates net operating income before depreciation, amortisation, interest, tax, and capital expenditure deductions for both passive income (current trading income) and potential income (additional income at sustainable occupancy). Potential income is subject to a higher degree of risk, reflected in a higher secondary capitalisation rate. The approach of disaggregating a property's net operating income between current passive income and future potential income allows appropriate risk adjusted capitalisation rates to be applied to each income stream.

The Group disaggregates primary and secondary capitalisation rates to provide more transparency to the valuation process. This gives visibility over the separate rates applied to passive income from current trading and potential income, and the resultant differing risk profile which exists between these income categories.

The key assumptions used to determine the fair value of the properties and the sensitivity analyses are provided in note 9.3.

#### 4. SEGMENT INFORMATION

The Group has identified its operating segments based on the internal management information used by the Managing Director of NSR, the Group's chief decision maker.

The Group operates wholly within one business segment being the ownership of storage centres in Australia and New Zealand. The operating results presented in the Statement of Profit and Loss represent the same segment information as reported to the Responsible Entity of NSPT. The Group's financing (including finance costs and interest income) are managed on a Group basis and not allocated to operating segments.

The operating results presented in the statement of profit or loss represent the same segment information as reported in internal management information.

#### Geographic information

	2021	2020
	\$'000	\$'000
Revenue from external customers		
Australia	88,206	76,349
New Zealand	11,597	11,594
Total	99,803	87,943

The revenue information above excludes interest income and is based on the location of storage centres.

# Geographic information

	2021 \$'000	2020 \$'000
Non-current operating assets		
Australia	2,555,944	1,958,408
New Zealand	340,223	274,957
Total	2,896,167	2,233,365

Non-current assets for this purpose consists of investment properties.

94% of revenue is received from the NSH Group, a related entity (2020: 94%).

#### 5. REVENUE FROM CONTRACTS WITH CUSTOMERS

	2021 \$'000	2020 \$'000
Design and development fees	-	123

#### FINANCE COSTS

	2021 \$'000	2020 \$'000
Interest on borrowings Reclassification from cash flow hedge reserve to statement	19,958	23,567
of profit or loss (see note 13)	10,923	7,764
Interest on lease liabilities	704	706
	31,585	32,037

# 7. INCOME TAX

NSPT is a 'flow through' entity for Australian income tax purposes and is an Attribution Managed Investment Trust, such that the determined tax components of NSPT will be taxable in the hands of unitholders on an attribution basis. NSPT's subsidiary National Storage New Zealand Property Trust ("NSNZPT") is an Australian registered trust which owns investment property in New Zealand. For New Zealand tax purposes NSNZPT is classed as a unit trust and is subject to New Zealand income tax at a rate of 28%.

The major components of income tax expense for the years ended 30 June 2021 and 30 June 2020 are:

Notes	2021 \$'000	2020 \$'000
Consolidated statement of profit or loss		,
Current tax	151	190
Deferred tax	1,422	1,214
Adjustment in relation to prior periods	(16)	22
Total income tax expense	1,557	1,426
Consolidated statement of comprehensive income		
Net (loss) / gain on revaluation of cash flow hedges 13	(6)	413
Reconciliation of tax expense and accounting profit multiplied by Australia's domestic tax rate for 2021 and 2020:	007.507	100.107
Profit before tax	307,537	129,186
Deduct profit before tax from Trusts owning Australian properties  Accounting profit before income tax	(270,069) 37,468	(95,034)
Accounting profit before income tax	37,400	34,152
Tax at the Australian tax rate of 30% (2020 – 30%)	11,240	10,246
Deductible / non-assessable income	(8,918)	(8,142)
Adjustments in respect of previous years	(16)	22
Non-deductible / assessable expenses	-	(17)
Effect of lower tax rates in New Zealand	(749)	(683)
Income tax expense	1,557	1,426
	2021	2020
	\$'000	\$'000
Deferred tax expense included in income tax expense comprises:		
Decrease in deferred tax assets	22	403
Increase in deferred tax liabilities	1,388	1,197
Exchange variations	6	27
Movement in deferred tax asset recognised in other comprehensive		1.12.63
income	1 400	(413)
Total deferred tax expense	1,422	1,214

	2021 \$'000	2020 \$'000
Deferred tax assets and liabilities		
Deferred tax assets		
The balance comprises temporary differences attributable to:		
Accrued expenses	4	23 3
Revaluation of cash flow hedges Total deferred tax assets	4	26
Deferred tax liabilities		
The balance comprises temporary differences attributable to:	(0)	
Trade and other receivables Revaluations of investment properties	(3) (4,108)	(2,723)
Total deferred tax liabilities	(4,111)	(2,723)
Net deferred tax liabilities	(4,107)	(2,697)
Reconciliation to statement of financial position		
Deferred tax liabilities	(4,107)	(2,697)

The Group offsets tax assets and liabilities if it has a legally enforceable right to set off current tax assets and current tax liabilities and the deferred tax assets and deferred tax liabilities relate to income taxes levied by the same tax authority. The Group has no tax losses that are available for offsetting against future taxable profits (2020: nil).

# 8. FINANCIAL ASSETS AND FINANCIAL LIABILITIES

The Group holds the following financial instruments:

	Notes	2021 \$'000	2020 \$'000
Financial assets At amortised cost		7 3 3 3	*
Cash and cash equivalents Trade and other receivables	8.1 8.2	22,379 17,150	71,966 6,246
Trade and other receivables	0.2	39,529	78,212
Measured at fair value Derivatives used for hedging	8.3	2,408	19
Total financial assets		41,937	78,231
Financial liabilities At amortised cost			
Trade and other payables	8.4	10,078	9,644
Borrowings	8.5	760,093 770,171	679,813 689,457
Measured at fair value		770,171	007,407
Derivatives used for hedging	8.6	125	407
Total financial liabilities		770,296	689,864

The Group's approach to financial risk management is discussed in note 14. The maximum exposure to credit risk at the end of the reporting period is the carrying amount of each class of financial asset mentioned above.

# 8.1. Cash and cash equivalents

	2021 \$'000	2020 \$'000
Cash at bank	22,379	71,966

# Cash flow reconciliation of net profit after tax to net cash flows from operations

	2021 \$'000	2020 \$'000
Profit for the year Income tax expense Profit before income tax	305,980 1,557 307,537	127,760 1,426 129,186
Adjustments to reconcile profit before tax to net cash flows: Fair value adjustment to investment properties Share of (profit) / loss of joint venture Interest income Finance costs	(243,460) (1,282) (265) 31,585	(78,302) 71 (225) 32,037
Changes in operating assets and liabilities: Decrease in receivables (Decrease) / increase in other assets Increase in payables (Decrease) / increase in deferred revenue Cash flows from operating activities	(709) (58) 1,306 (48) <b>94,60</b> 6	(2,968) 5 1,361 30 <b>81,195</b>
Interest received Income tax paid Net cash flows from operating activities	217 (258) <b>94,565</b>	76 (65) <b>81,206</b>

# 8.2. Trade and other receivables

	Notes	2021 \$'000	2020 \$'000
Current			
GST and employment taxes receivable		722	-
Other receivables		453	579
Receivables from related parties	16	15,975	5,667
Total	_	17,150	6,246

See note 16 for terms and conditions relating to related party receivables.

At 30 June 2021 and 30 June 2020, the Group has not recognised an allowance for expected credit losses relating to its receivables as there is no historical credit loss experience and no forward-looking factors which impact recoverability.

#### 8.3. Other assets

	2021 \$'000	2020 \$'000
Current		
Prepayments	70	12
Financial assets (derivatives)	11	-
	81	12
Non-current		
Financial assets (derivatives)	2,397	19
Total current and non-current	2,478	31

All derivatives have been designated as cash flow hedges. They are presented as current assets or liabilities if they are expected to be settled within 12 months after the end of the reporting period. The derivatives above relate to interest rate swaps held by the Group, for further details see note 8.

# 8.4. Trade and other payables

	2021 \$'000	2020 \$'000
Current		
Accrued expenses	5,899	5,926
GST and employment taxes payable	26	74
Other payables	731	816
Related party payables	3,422	2,828
Total	10,078	9,644

Other payables and accruals are paid when amounts fall due. The carrying amounts of trade and other payables are assumed to be the same as their fair values, due to their short-term nature.

# 8.5. Borrowings

	2021	2020
	\$'000	\$'000
Non-current		
Bank finance facilities	760,093	679,813
Non-amortised borrowing costs	(3,293)	(3,361)
Total borrowings	756,800	676,452

The Group has non-current borrowing facilities denominated in Australian Dollars ("**AUD**") and New Zealand Dollars ("**NZD**"). All facilities are interest only facilities with any drawn balances payable at maturity. Drawn amounts and facility limits are as follows:

	2021 \$'000	2020 \$'000
Bank finance facilities (AUD)		,
Drawn amount	546,750	483,750
Facility limit	930,000	830,000
Bank finance facilities (NZD)		
Drawn amount	229,150	209,750
Facility limit	251,750	226,750
AUD equivalent of NZD facilities		
Drawn amount	213,343	196,063
Facility limit	234,384	211,954

The major terms of these agreements are as follows:

- At 30 June 2021 maturity dates on the facilities range from 23 July 2022 to 23 December 2026. (30 June 2020: maturity dates from 23 July 2021 to 23 December 2026).
- The interest rate applied is the bank bill rate plus a margin depending on the gearing ratio.
- Security has been granted over the Group's investment properties.

During the year ended 30 June 2021, the Group refinanced part of the existing debt facilities, and increased its club banking facilities by AUD \$100m and NZD \$25m. (Year ended 30 June 2020: facilities increased by AUD \$150m and NZD \$30m).

The Group has complied with the financial covenants of their borrowing facilities during the 2021 and 2020 reporting periods (see note 15). The fair value of borrowings approximates carrying value. Details of the exposure to risk arising from current and non-current borrowings are set out in note 14.

#### Interest rate swaps

The Group has the following interest rate hedges in place as at the end of the reporting period:

	2021 \$'000	2020 \$'000
Interest rate hedges (AUD)		
Current interest rate hedges	385,000	460,000
Future interest rate hedges	-	25,000
Interest rate hedges (NZD) Current interest rate hedges	50,000	50,000
AUD equivalent of NZD interest rate hedges Current interest rate hedges	46,551	46,737

Interest rate hedges in place at the end of the reporting period have maturity dates ranging from 23 September 2021 to 23 September 2026 (2020: 23 September 2020 to 23 September 2026).

During the prior year ended 30 June 2020, the Group reset the interest rates associated with AUD and NZD denominated interest rate swaps. This resulted in a cash outflow of \$14.3m which reduced the Group's financial liability presented in note 8.8.

The cumulative change in fair value of these hedging instruments is carried in the cash flow hedge reserve in equity. This balance will be amortised from the hedge reserve to finance costs in the statement of profit and loss in future reporting periods corresponding to when the underlying hedged item impacts profit or loss. For the year ended 30 June 2021 \$10.9m (30 June 2020: \$7.8m) has been recognised in finance costs relating to this item (see note 6).

#### Hedge of net investments in foreign operations

Included in borrowings at 30 June 2021, amounts totalling NZD \$51.9m (AUD \$48.3m) have been designated as a hedge of the net investments against the value of investment properties held in New Zealand (2020: NZD \$51.9m, (AUD \$48.5m)). These borrowings are being used to hedge the Group's exposure to the NZD foreign exchange risk on these investments. Gains or losses on the retranslation of this borrowing are transferred to other comprehensive income to offset any gains or losses on translation of the net investments in the subsidiaries. There is no hedge ineffectiveness in the years ended 30 June 2021 or 30 June 2020 recognised in the statement of profit or loss.

#### 8.6. Other liabilities

	Notes	2021 \$'000	2020 \$'000
Current financial liabilities Interest rate swaps	8.8	22	50
Non-current financial liabilities Interest rate swaps	8.8	103	357
Total current and non-current	-	125	407

For details on the classification of derivatives see note 8.8.

#### 8.7. Lease liabilities

	2021 \$'000	2020 \$'000
Current lease liabilities		
Lease liabilities relating to right of use assets presented as leasehold investment properties  Non-current lease liabilities	780	761
Lease liabilities relating to right of use assets presented as leasehold investment properties	16,166	16,242
Total lease liabilities	16,946	17,003

#### Group as a lessor

The Group's investment properties are leased to entities within the NSH Group and third-party tenants under long-term leases (see note 9.1). Future minimum rentals receivable under non-cancellable operating leases as at are as follows:

	30 June 2021 \$'000	30 June 2020 \$'000
Within one year	63,172	56,479
After one year but not more than five years	234,406	221,244
More than five years	720,223	617,598
Total	1,017,801	895,321

#### 8.8. Financial instruments fair value measurement

# Fair value hierarchy

This note explains the judgements and estimates made in determining the fair values of the financial instruments recognised in the financial statements, as detailed in notes 8.1 to 8.7. To provide an indication about the reliability of the inputs used in determining fair value, financial instruments are classified into the following three levels.

**Level 1:** The fair value of financial instruments traded in active markets (such as publicly traded derivatives, and trading and available-for-sale securities) is based on quoted market prices at the end of the reporting period. The quoted market price used for any financial assets held is the current bid price. These instruments are included in level 1.

**Level 2:** The fair value of financial instruments that are not traded in an active market (for example, over-the-counter derivatives) is determined using valuation techniques which maximise the use of

observable market data and rely as little as possible on entity-specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level 2.

**Level 3:** If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3.

Specific fair valuation techniques used to determine fair values include:

The fair value of interest rate swaps is calculated as the present value of the estimated future cash
flows based on observable yield curves, adjusted for counterparty or own credit risk.

The resulting fair value estimates for interest rate swaps are included in level 2.

	Notes	Level 1 \$'000	Level 2 \$'000	Level 3 \$'000	Total \$'000
At 30 June 2021					
Derivatives used for hedging - interest

Non-current financial liabilities	8.6		(357)	-	(357)
		-	(388)	-	(388)

There were no transfers between levels of fair value hierarchy during the years ended 30 June 2021 or 30 June 2020.

## 9. NON-FINANCIAL ASSETS AND LIABILITIES

This note provides information about the Group's non-financial assets and liabilities including:

- An overview of all non-financial assets and liabilities held by the Group;
- Specific information about each type of non-financial asset and non-financial liability; and
- Information about determining the fair value of the non-financial assets and liabilities, including areas of judgement, estimates and other assumptions.

## 9.1. Investment properties

	Notes	2021 \$'000	2020 \$'000
Investment properties in operation	9.3	2,812,374	2,163,784
Investment properties under construction	7.10	83,793	69,581
Total investment properties		2,896,167	2,233,365
Investment properties in operation			
Opening balance at 1 July		2,163,784	1,861,023
Property acquisitions		336,908	215,895
Property disposals		-	(3,984)
Improvements to investment properties		1,479	4,852
Items reclassified from investment property under		47.004	17.440
construction		67,894	17,448
Items reclassified to freehold investment property under			(4.100)
construction Reassessment of lease terms		2	(4,188)
Lease diminution, presented as fair value adjustments		(58)	(36)
Net gain from fair value adjustments		243,518	78,338
Effect of movement in foreign exchange		(1,153)	(5,564)
Closing balance at 30 June		2,812,374	2,163,784
• • • • • • • • • • • • • • • • • • • •		, , , , , ,	,,
Investment property under construction			
Opening balance at 1 July		69,581	27,199
Property acquisitions		36,184	15,061
Development costs		46,060	41,087
Items reclassified to investment properties		(67,894)	(17,448)
Items reclassified from investment properties		-	4,188
Effect of movement in foreign exchange		(138)	(506)
Closing balance at 30 June		83,793	69,581

Included within net gain from fair value adjustments for the prior year ended 30 June 2020 are realised gains of \$3m relating to the divestment of investment properties.

# 9.2. Deferred revenue

	2021 \$'000	2020 \$'000
Deferred revenue from rental income	30	78

Deferred rent revenue from rental income represents funds received in advance from tenants.

### 9.3. Non-financial assets fair value measurement

The Group has classified its non-financial assets held at fair value into the three levels prescribed in note 8.8 to provide an indication about the reliability of inputs used to determine fair value.

	Notes	Level 1 \$'000	Level 2 \$'000	Level 3 \$'000	Total \$'000
At 30 June 2021					
Investment properties	9.1	-	-	2,812,374	2,812,374
At 30 June 2020	<del>-</del>				
Investment properties	9.1	-	-	2,163,784	2,163,784

## Recognised fair value measurements

The Group's policy is to recognise transfers into and out of fair value hierarchy levels at the end of the reporting period. There were no transfers between levels 1 and 2 or between levels 2 and 3 for recurring fair value measurements during the current or prior year.

## Fair value measurements using significant unobservable inputs (level 3)

## Valuation techniques used to determine level 3 fair values and valuation process

Investment properties, principally storage buildings, are held for rental to tenants operating self-storage facilities and are carried at fair value. Changes in fair values are presented in profit or loss as fair value adjustments.

Fair values are determined by a combination of independent valuations and Director valuations. The independent valuations are performed by an accredited independent valuer. Investment properties are independently valued on a rotational basis every three years unless the underlying financing requires a more frequent valuation cycle. For properties subject to an independent valuation report the Directors verify all major inputs to the valuation and review the results with the independent valuer. The Director valuations are completed by the NSH Group Board. The valuations are determined using the same techniques and similar estimates to those applied by the independent valuer.

The Group obtains the majority of its external independent valuations at each financial year end. The Group's policy is to maintain the valuation of the investment property valued in the preceding year at external valuation, unless there is an indication of a significant change to the property's valuation inputs. Freehold investment properties acquired in the year ended 30 June 2021 have been held at acquisition price.

Due to general market and economic uncertainty in relation to COVID-19, there is a heightened degree of valuation uncertainty which could cause property values to change significantly and unexpectedly over a short period of time. However, the financial impact of COVID-19 on the Group's business has been minimal to date and the Group considers that there continues to be a strong demand for storage rental as evidenced by NSR's strong occupancy levels which underpin the operating results.

At 30 June 2021, the Group held 37% of investment properties at external valuation. (30 June 2020: 33%).

## Valuation inputs and relationship to fair value

Description	Significant unobservable inputs	Range at 30 June 2021	Range at 30 June 2020
Investment	Primary capitalisation rate	5.0% to 7.0%	5.5% to 8.2%
properties	Secondary capitalisation rate	6.0% to 8.0%	6.0% to 8.6%
	Weighted average primary cap rate	5.9%	6.4%
	Weighted average secondary cap rate	6.4%	7.1%
	Sustainable occupancy	75% to 98%	73% to 95%
	Stabilised average EBITDA	\$963,839	\$923,427

Under the income capitalisation method, a property's fair value is estimated based upon a combination of current earnings before interest, tax, depreciation and amortisation ("EBITDA") generated by the property, which is divided by the primary capitalisation rate (the investor's required rate of return) and additional EBITDA (stabilised EBITDA less current EBITDA) divided by the secondary capitalisation rate. Stabilised EBITDA reflects the estimated EBITDA generated once a property reaches a sustainable level of operations. The value attributed to the secondary capitalisation is then discounted to account for the estimated time and additional costs required to deliver this additional value.

The capitalisation rates are derived from recent sales of similar properties. The secondary capitalisation rate is typically higher than the primary capitalisation rate to reflect the additional risk associated with these cashflows. Generally, an increase in stabilised average EBITDA will result in an increase in fair value of an investment property. An increase in the vacancy rate will result in a reduction of the stabilised average EBITDA. Investment properties are valued on a highest and best use basis. The current use of all of the investment properties (self-storage) is considered to be the highest and best use.

The capitalisation rate adopted reflects the inherent risk associated with the property. For example, if the lease expiry profile of a particular property is short, the capitalisation rate is likely to be higher to reflect additional risk to income. The higher capitalisation rate then reduces the valuation of the property. The following tables present the sensitivity of investment property fair values to changes in input assumptions.

### At 30 June 2021:

	Increase/ (decrease) in input	Increase/ (decrease) in fair value \$'000
Primary capitalisation rate	1% / (1%)	(352,120) / 500,170
Secondary capitalisation rate	2% / (2%)	(96,400) / 180,310
Sustainable occupancy	5% / (5%)	169,010 / (73,120)
Stabilised average EBITDA	5% / (5%)	130,030 / (77,740)

#### At 30 June 2020:

	Increase/ (decrease) in input	Increase/ (decrease) in fair value \$'000
Primary capitalisation rate Secondary capitalisation rate Sustainable accurages	1% / (1%) 2% / (2%)	(226,290) / 311,570 (123,160) / 218,030
Sustainable occupancy Stabilised average EBITDA	5% / (5%) 5% / (5%)	119,620 / (107,750) 99,000 / (95,190)

## 10. INFORMATION RELATING TO SUBSIDIARIES

The ultimate holding entity of the Group is National Storage Property Trust.

The consolidated financial statements of the Group as at 30 June 2021 include:

Name of controlled entity	Place of registration Equity inte		interest
		2021	2020
National Storage Investment Trust	Australia	100%	100%
National Storage Victorian Property Trust	Australia	100%	100%
National Storage New Zealand Property Trust *	Australia	100%	100%
National Storage Southern Trust	Australia	100%	100%

<sup>\*</sup> NSNZPT is an Australian registered trust which holds investment properties in New Zealand

## 11. INTEREST IN JOINT VENTURE

	2021 \$'000	2020 \$'000
Opening balance at 1 July Share of profit / (loss) from joint venture	1,009 1,282	1,080 (71)
Closing balance at 30 June	2,291	1,009

## Investment in joint venture

The Group holds a 25% interest in the Bundall Storage Trust (2020: 25%). This investment is classified as a joint venture as all parties are subject to a Securityholders Agreement that has been contractually structured such that the parties to the agreement have equal representation on the advisory board responsible for the overall direction and supervision of the trust.

The Bundall Storage Trust develops investment property. As at 30 June 2021, the Bundall Storage Trust had one storage centre investment property.

The Bundall Storage Trust is not listed on any public exchange.

# 12. CONTRIBUTED EQUITY

	2021 \$'000	2020 \$'000
Issued and paid up capital	1,568,864	1,266,588

Number of units on issue		
	2021	2020
Opening balance at 1 July	1,013,740,898	673,928,751
Institutional and retail placement	162,736,215	329,205,527
Distribution reinvestment plan	6,592,947	10,606,620
Closing balance at 30 June	1,183,070,060	1,013,740,898

### Capital raises

On 8 June 2021, NSR announced a fully underwritten \$325m equity raising. This resulted in the issue of 137,037,814 new units on 23 June 2021 and 25,698,401 new units on 30 June 2021. The issue price represented a discount of 3.8% on the last closing price of NSR stapled securities on 7 June 2021.

In the prior year ended 30 June 2020, NSR raised a total of \$361.9m of equity resulting in the issue of 329,205,527 new units.

### Distribution reinvestment plan

During the year, 6,592,947 (2020: 10,606,620) units were issued to unitholders participating in NSR's Distribution Reinvestment Plan for consideration of \$12m (2020: \$19.7m). The units were issued at the volume weighted average market price of NSR's securities over a period of ten trading days, less a 2% discount.

92% of the total value of equity raised (\$337.5m) has been apportioned to the Group based upon the proportionate net asset split of NSR at the most recent financial reporting period prior to each equity raise.

## Terms and conditions of contributed equity

### Stapled securities

A stapled security represents one unit in NSPT and one share in NSH. Stapled securityholders have the right to receive declared distributions from NSPT and dividends from NSH and are entitled to one vote per stapled security at securityholders' meetings. Holders of stapled securities can vote their shares and units in accordance with the Corporations Act 2001, either in person or by proxy, at a meeting of either NSPT or NSH. The stapled securities have no par value.

In the event of the winding up of NSPT and NSH, stapled securityholders have the right to participate in the proceeds from the sale of all surplus assets in proportion to the number of and amounts paid up on stapled securities held. Ordinary stapled securityholders rank after all creditors in repayment of capital.

There is no current on or off market buy-back of stapled securities.

#### 13. OTHER RESERVES

	2021 \$'000	2020 \$'000
Foreign currency translation reserve		
Opening balance at 1 July	(1,010)	758
Net investment hedge	194	1,127
Foreign exchange translation differences	(688)	(2,895)
Closing balance at 30 June	(1,504)	(1,010)
Cash flow hedge reserve Opening balance at 1 July	(29,738)	(23,881)
Revaluation of cash flow hedges	2,652	(13,208)
Reclassification to statement of profit or loss (see note 6)	10,923	7,764
Taxation impact on revaluation	6	(413)
Closing balance at 30 June	(16,157)	(29,738)
Other reserves	(17,661)	(30,748)

The hedging reserve is used to record gains or losses on derivatives that are designated as cash flow hedges and recognised in other comprehensive income, as described in note 2(m). Amounts are reclassified to profit or loss in the period when the associated hedged transaction takes place.

In previous years, the Group has reset the interest rates associated with interest rate swaps designated as cash flow hedges. In the prior year ended 30 June 2020, this resulted in a cash outflow of \$14.3m which reduced the Group's financial liability as presented in note 8.8. In accordance with AASB 9 Financial instruments, as the nature of the underlying hedged instrument is unchanged the fair value of these outflows remain in the cash flow hedge reserve and are amortised to the statement of profit or loss in both the current and future periods relating to the profile of the original instrument.

Taxation impact on revaluation applies only to cash flow hedges held in NSNZPT, a sub-trust of NSPT, which is subject to New Zealand tax legislation. Deferred tax does not apply to any other cash flow hedges held in the Group under current Australian tax legislation.

### 14. FINANCIAL RISK MANAGEMENT

This note outlines the Group's exposure to financial risks and how these risks could affect future financial performance.

The Group's overall risk management program focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the financial performance of the business. The Group uses derivative financial instruments such as interest rate swaps to hedge certain market risk exposures.

Risk management for the Group is carried out by the NSH Board and key management personnel of NSH. The NSH Board of Directors analyses, on behalf of the Group, interest rate exposure and evaluates treasury management strategies in the context of the most recent economic conditions and forecasts.

### **Derivatives**

Derivatives are only used for economic hedging purposes and not as trading or speculative instruments. The Group has the following derivative financial instruments:

	Notes	2021 \$'000	2020 \$'000
Interest rate swaps designated as cash flow hedges			
presented in:			
Current assets	8.3	11	-
Non-current assets	8.3	2,397	19
Current liabilities	8.6	(22)	(50)
Non-current liabilities	8.6	(103)	(357)
Net liabilities		2,283	(388)

## Classification of derivatives

All derivatives have been designated as cash flow hedges. They are presented as current assets or liabilities if they are expected to be settled within 12 months after the end of the reporting period.

The Group's accounting policy for cash flow hedges is set out in note 2(1). For hedged forecast transactions that result in the recognition of a non-financial asset, the Group has included related hedging gains and losses in the initial measurement of the cost of the asset. The ineffectiveness recognised in the statement of profit or loss was immaterial.

### Fair value measurement

For information about the methods and assumptions used in determining fair values of derivatives refer to note 8.8.

#### Market risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises of three types of risk: interest rate risk, currency risk and other price risk, such as equity price and commodity risk. Financial instruments affected by market risk include loans and borrowings, deposits, available-for-sale investments and derivative financial instruments.

The sensitivity analysis in the following sections relate to the position as at 30 June 2021 and 30 June 2020. The sensitivity analysis has been prepared on the basis that the amount of net debt, the ratio of fixed to floating interest rates of debt and derivatives and the proportion of financial instruments in

foreign currencies are all constant on the basis of hedge designations in place at 30 June 2021 and 30 June 2020.

The analysis excludes the impact of movements in market variables on provisions and the non-financial assets and liabilities of foreign operations.

The following assumptions have been made in calculating sensitivity analysis:

- The sensitivity of the relevant statement of profit or loss item is the effect of the assumed changes in respective market risks. This is based on the financial assets held at 30 June 2021 and 30 June 2020 including the effect of hedge accounting.
- The sensitivity of equity is calculated by considering the effect of any associated cash flow hedges and hedges of a net investment in a foreign subsidiary at 30 June 2021 for the effects of the assumed changes of the underlying risk.

#### Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Group's exposure to the risk of changes in market interest rates relate primarily to their long-term debt obligations with floating interest rates.

The Group manages its interest rate risk by having a balanced portfolio of fixed and variable rate loans and borrowings. To manage this, the Group enters into interest rate swaps, in which it agrees to exchange, at specified intervals, the difference between fixed and variable rate interest amounts calculated by reference to an agreed-upon notional principal amount. At 30 June 2021, after taking into account the effect of interest rate swaps, 56.8% (2020: 74.5%) of the Group's borrowings are at a fixed rate of interest.

#### Interest rate sensitivity

The following table demonstrates the sensitivity to a possible change in interest rates on the portion of loans and borrowings affected, after the impact of hedge accounting. With all other variables held constant, the Group's profit before tax is affected through the impact on floating rate borrowings, as follows:

	Increase/ decrease in basis points	Effect on profit before tax \$'000
2021 Australian dollar denominated debt New Zealand dollar denominated debt	+50 / -50 +50 / -50	(1,399) / 1,399 (765) / 765
<b>2020</b> Australian dollar denominated debt New Zealand dollar denominated debt	+50 / -50 +50 / -50	(846) / 846 (692) / 692

The assumed movement in basis points for the interest rate sensitivity analysis is based on the currently observable market environment.

## Foreign currency risk

Foreign currency risk is the risk that the fair value of future cash flows of an exposure will fluctuate because of changes in foreign exchange rates. The Group's exposure to the risk of changes in foreign exchange rates relates primarily to the Group's operating activities (when revenue or expense is denominated in a foreign currency), and the Group's net investment in foreign subsidiaries.

## Foreign currency sensitivity

The following tables demonstrate the sensitivity to a reasonably possible change in New Zealand Dollar exchange rate with all other variables held constant.

	Change in NZD rate	Effect on profit before tax \$'000	Effect on pre- tax equity \$'000
2021	+5%	(1,739)	(5,608)
	-5%	1,923	6,199
2020	+5%	(1,563)	(3,854)
	-5%	1,739	4,260

The movement in the profit before tax is a result of a change in the fair value of the monetary assets and liabilities denominated in NZD.

The movement in pre-tax equity arises from changes in NZD borrowings (net of cash and cash equivalents) in the hedge of net investments in New Zealand operations and cash flow hedges. These movements will offset the translation of New Zealand operations' net assets into AUD.

### Credit risk

Credit risk is the risk that a counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The Group is exposed to credit risk from its operating activities (primarily receivables related to rental income) and from its financing activities, including deposits with banks and other financial instruments.

#### Trade receivables

The Group's customer credit risk is managed by renting the majority of properties to the NSH Group entities: National Storage (Operations) Pty Ltd, Southern Cross Storage Operations Pty Ltd and National Storage Limited. Other non-related parties also have rented facilities at some NSPT investment properties. These rental revenues are not significant compared with related party rental revenues and overall credit risk is low.

### Cash and cash equivalents

The Group's credit risk on cash and cash equivalents is limited because the counterparties are banks with high credit-ratings assigned by international credit-rating agencies. The maximum exposure to credit risk for the components of the statement of financial position at 30 June 2021 and 30 June 2020 is the carrying amounts as indicated in the statement of financial position.

### Liquidity risk

Liquidity risk is the risk that the group will not be able to meet its financial obligations as they fall due. The objective of managing liquidity risk is to ensure, as far as possible, the group will always have sufficient liquidity to meet its liabilities when they fall due, under both normal and stressed conditions.

The Group has a number of policies and processes for managing liquidity risk. These include:

- Continuously monitoring cash flows on a daily basis as well as forecasting cash flows on a medium and long-term basis.
- Monitoring the maturity profiles of financial assets and liabilities in order to match inflows and outflows.
- Maintaining adequate reserves and support facilities.
- Monitoring liquidity ratios and all constituent elements of working capital.
- Maintaining adequate borrowing and finance facilities.

### Financing arrangements

The Group had access to the following undrawn borrowing facilities at the end of the reporting period:

	2021 \$'000	2020 \$'000
Floating rate		
Expiring beyond one year (loans)	403,041	360,891

All secured bank loans may be drawn at any time and is subject to an annual review. Further details of the bank loans are detailed in notes 8.5 and 15.

## Maturity of financial liabilities

The tables below summarise the maturity profile of the Group's financial liabilities based on contractual undiscounted payments. As amounts disclosed in the table are the contractual undiscounted cash flows including future interest payments, these balances will not necessarily agree with the amounts disclosed on the statement of financial position.

	On demand \$'000	Less than 3 months \$'000	3 to 12 months \$'000	1 to 5 years \$'000	Over 5 years \$'000	Total \$'000

<sup>\*</sup>Other balances presented above represent distributions declared in the year: \$90.4m (30 June 2020: \$71.5m) (see note 15), less units issued under the distribution reinvestment plan which do not result in a cash outflow: \$12m (30 June: 2020; \$19.7m (see note 12).

<sup>\*\*</sup>Relates to principal portion of lease liability payment. Total lease payments for the year ended 30 June 2021 were \$0.8m (30 June 2020: \$0.7m) as disclosed in the Consolidated Statement of Cashflows.

### 15. CAPITAL MANAGEMENT

The Group's objectives when managing capital are two-fold, to safeguard its ability to continue as a going concern, and to maintain an optimal structure to reduce the cost of capital and maximise long term value for the securityholder. The Responsible Entity has outsourced capital management for the Group to NSH under a management agreement.

In order to achieve these objectives, the Group's capital management strategy aims to ensure that it meets financial covenants attached to loans and borrowings. Breaches in meeting a financial covenant would permit the lender to immediately call loans and borrowings. There have been no breaches in the financial covenants of any interest-bearing loans and borrowings in the year.

The Group manages its capital structure and makes adjustments in light of changes in economic conditions and the requirements of its financial covenants. To maintain or adjust the capital structure, the Group may adjust the distribution payment to unitholders, return capital to unitholders or issue new units.

The Group monitors capital using a gearing ratio, represented by net debt divided by total assets less cash and short term deposits and lease liabilities. Net debt includes borrowings, less cash and short-term deposits.

	Notes	2021 \$'000	2020 \$'000
Interest bearing loans Less: cash and short term deposits Net debt	8.5 8.1	760,093 (22,379) 737,714	679,813 (71,966) 607,847
Total assets Less cash and short term deposits Less lease liabilities		2,940,465 (22,379) (16,946) 2,901,140	2,312,617 (71,966) (17,003) 2,223,648
Gearing ratio		25%	27%

#### Loan covenants

Financial covenants under the terms of the Group's borrowing agreement require the Group to ensure that the gearing ratio does not exceed 55% and the ratio of operating earnings adjusted for interest, tax, depreciation and finance amortisation costs equals or exceeds a multiple of two. The Group has complied with these covenants throughout the reporting period.

### **Distributions**

Distributions have been made and declared as noted below.

Unit distributions	2021 \$'000	2020 \$'000
NSPT interim distribution of 4 cents per unit paid on 1 March 2021 (2020: 4.7 cents per unit)	40,708	37,039
NSPT final distribution of 4.2 cents per unit payable on 3 September 2021 (2020: 3.4 cents per unit)	49,689	34,467
	90,397	71,506

There are no proposed distributions not recognised as a liability for the year ended 30 June 2021.

### 16. RELATED PARTY TRANSACTIONS

The following tables provide the total amount of transactions that have been entered into with related parties for the relevant financial years.

Transactions with Related Parties		Revenue from related parties \$	Purchases from related parties \$	Amount owed by related parties	Amount owed to related parties
National Storage Holdings Limited	2021 2020	-	- -	15,971,809 -	- 1,657,492
National Storage (Operations) Pty Ltd	2021 2020	69,054,809 58,588,991	998,575 850,224	3,345	- 577,125
Southern Cross Storage Operations Pty Ltd	2021 2020	14,449,000 14,444,000	-	-	-
National Storage Financial Services Limited	2021 2020	-	2,171,430 1,858,695	-	643,190 592,501
National Storage Limited	2021 2020	10,103,587 10,026,201	-	- 5,666,426	2,779,019

## Terms and conditions of transactions with related parties

The sales to and purchases from related parties are made on terms equivalent to those that prevail in arm's length transactions. All other outstanding balances are unsecured and interest free. There have been no guarantees provided or received for any related party receivables or payables. For the years ended 30 June 2021 and 30 June 2020, the Group has not recorded any impairment of receivables relating to amounts owed by related parties.

## 17. COMMITMENTS AND CONTINGENCIES

### Capital commitments

As at 30 June 2021, the Group held commitments to purchase four freehold investment properties and three development sites for \$53.7m (30 June 2020: three freehold investment properties for \$39m).

As at 30 June 2021, the Group has contractual commitments in place for the construction of self-storage centres of NZD \$32.5m (AUD \$30.3m) in New Zealand (see note 10.3), (30 June 2020: \$10.6m in Australia and NZD \$1.7m (AUD \$1.6m) in New Zealand).

As at 30 June 2021, the Group held a commitment with a third party, to supply and install solar panels on a number of NSR storage centres for \$0.5m (30 June 2020: \$1.1m).

There is no other capital expenditure contracted for at the end of the reporting period but not recognised as a liability. There are no other contingent assets or liabilities for the Group.

## Lease liability commitments

For details of lease liability commitments see note 8.7.

## **Contingent liabilities**

The Group did not have any contingent liabilities as at 30 June 2021 and 30 June 2020.

# 18. EARNINGS PER UNIT ("EPU")

Basic earnings per unit is calculated as net profit attributable to unitholders, adjusted to exclude costs of servicing equity (other than distributions) divided by the weighted average number of units on issue during the period under review.

Diluted earnings per unit adjust the figures used in the determination of basic earnings per unit to take into account:

- The after tax effect of interest and other financing costs associated with dilutive potential units and;
- The weighted average number of additional units that would have been outstanding assuming the conversion of all dilutive potential units.

	2021	2020 Restated
Weighted average number of units on issue during the year Adjustment under AASB 133 to reflect discount to market price	1,020,912,858	815,973,324
on issue of new capital Weighted average number of units used to calculate basic and diluted earnings per stapled unit	4,417,359	18,867,209
	1,025,330,217	834,840,533
Reconciliation of earnings used in calculating earnings per unit Net profit attributable to members (\$'000)	305,980	127,760
Basic and diluted earnings per unit (cents)	29.84	15.30

As required by AASB 133 Earnings per share, for capital raises during the year ended 30 June 2021, the weighted average number of units on issue used to calculate statutory basic and diluted earnings per unit has been adjusted to reflect the difference between the issue price and the fair value of units prior to issue. No actual units were issued relating to this adjustment.

The weighted average number of units for the year ended 30 June 2020 used to calculate basic and diluted earnings per unit has also been restated on this basis.

## 19. AUDITORS' REMUNERATION

The auditor of the Group is Ernst & Young Australia.

	2021 \$	<b>2020</b> \$
Amounts received or due and receivable by Ernst & Young Australia for:		
Category 1 – Fees for auditing the statutory financial report of the group and any other group entity Category 2 – Fees for assurance services that are required by legislation	88,700	61,900
to be provided by the auditor Category 3 - Fees for other assurance services under other legislation or	-	-
contractual arrangements where there is discretion on service provider	-	-
Category 4- Fees for other services	30,990	16,750
Total auditors' remuneration	119,690	78,650

## 20. INFORMATION RELATING TO THE PARENT ENTITY

## **Summary financial information**

The individual financial statements for NSPT, the parent entity of the Group, show the following aggregate amounts:

	NSPT		
	2021	2020	
	\$'000	\$'000	
Current assets Total assets	144,691 2,569,880	172,232 2,021,445	
Current liabilities	(64,478)	(57,475)	
Total liabilities	(673,725)	(603,925)	
Net assets	1,896,155	1,417,520	
Issued capital	1,568,864	1,266,583	
Cash flow hedge reserve	(15,897)	(28,419)	
Foreign currency translation reserve	(90)	(284)	
Retained earnings	343,278	179,640	
	1,896,155	1,417,520	
Profit after tax	254,134	73,676	
Total comprehensive income	266,850	69,205	
Distributions	(90,397)	(71,506)	

## Guarantees entered into by the parent entity

The Group's parent entity has provided financial guarantees in respect of bank overdrafts and loans amounting to \$760.1m (2020: \$679.8m), secured by registered mortgages over the investment properties of the Group.

The Group's parent entity has provided bank guarantees of \$0.3m (2020: \$0.3m) to third party lessors.

## Contingent liabilities of the parent entity

The parent entity of Group did not have any contingent liabilities as at 30 June 2021 or 30 June 2020.

# 21. EVENTS AFTER REPORTING PERIOD

For the period from 1 July 2021 to the date of this report the Group settled two storage centre investment properties for a total cost of \$21m, and one development site for NZD \$3m (AUD \$2.8m). An additional storage centre is under contract for NZD \$10.1m (AUD \$9.4m) and is due to settle in late August 2021.

# **DIRECTORS' DECLARATION**

In accordance with a resolution of the Directors of National Storage Financial Services Limited, the Responsible Entity states that:

- 1. In the opinion of the Responsible Entity:
  - the financial statements and notes of the Group for the year ended 30 June 2021 are in accordance with the Corporations Act 2001, including:
    - giving a true and fair view of the Group's financial position as at 30 June 2021 and of its performance for the year ended on that date; and
    - (ii) complying with Accounting Standards and the Corporations Regulations 2001:
  - (b) the financial statements and notes also comply with International Financial Reporting Standards as disclosed in note 2(b); and
  - (c) there are reasonable grounds to believe that the Group will be able to pay its debts as and when they become due and payable.
- This declaration has been made after receiving the declarations required to be made 2. to the Directors of National Storage Financial Services Limited by the Chief Executive Officer and Chief Financial Officer of the NSR Group in accordance with section 295A of the Corporations Act 2001 for the financial year ended 30 June 2021.

On behalf of the Responsible Entity,

Laurence Brindle Chairman

24 August 2021

# Independent Auditor's Report to the Members of National Storage Property Trust

# Report on the Audit of the Financial Report

## Opinion

We have audited the financial report of National Storage Property Trust (the Trust) and its subsidiaries (collectively the Group), which comprises the consolidated statement of financial position as at 30 June 2021, the consolidated statement of profit or loss, consolidated statement of comprehensive income, consolidated statement of changes in equity and consolidated statement of cash flows for the year then ended, notes to the financial statements, including a summary of significant accounting policies, and the directors' declaration.

In our opinion, the accompanying financial report of the Group is in accordance with the *Corporations Act 2001*, including:

- a) giving a true and fair view of the consolidated financial position of the Group as at 30 June 2021 and of its consolidated financial performance for the year ended on that date; and
- b) complying with Australian Accounting Standards and the Corporations Regulations 2001.

# **Basis for Opinion**

We conducted our audit in accordance with Australian Auditing Standards. Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Report* section of our report. We are independent of the Group in accordance with the auditor independence requirements of the *Corporations Act 2001* and the ethical requirements of the Accounting Professional and Ethical Standards Board's APES 110 *Code of Ethics for Professional Accountants (including Independence Standards)* (the Code) that are relevant to our audit of the financial report in Australia. We have also fulfilled our other ethical responsibilities in accordance with the Code.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

## **Key Audit Matters**

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial report of the current year. These matters were addressed in the context of our audit of the financial report as a whole, and in forming our opinion thereon, but we do not provide a separate opinion on these matters. For each matter below, our description of how our audit addressed the matter is provided in that context.

We have fulfilled the responsibilities described in the *Auditor's Responsibilities for the Audit of the Financial Repor*t section of our report, including in relation to these matters. Accordingly, our audit included the performance of procedures designed to respond to our assessment of the risks of material misstatement of the financial report. The results of our audit procedures, including the procedures performed to address the matter below, provide the basis for our audit opinion on the accompanying financial report.

## Investment property valuation

## Why significant

Investment properties represent approximately 98% of the Group's total assets. These assets are carried at fair value, which is assessed by the directors with reference to either external independent property valuations or internal valuations and are based on market conditions existing at reporting date.

This was considered a key audit matter due to the number of judgments required in determining fair value. These judgments include assessing the capitalisation rates, sustainable occupancy and stabilised average EBITDA (earnings before interest, tax, depreciation and amortisation).

Disclosure relating to investment properties and the associated significant judgments are included in Notes 2(o), 3, 9.1, and 9.3 of the financial report.

### How our audit addressed the key audit matter

Our audit procedures included the following:

- With the involvement of our real estate valuation specialists, we assessed the suitability of the valuation methodologies, the competence, qualifications and objectivity of both the Group's internal valuers and external valuation experts, and the assumptions used in the valuations. These assumptions and inputs included capitalisation rates, occupancy rates including forecast occupancy levels, and stabilised average EBITDA;
- Agreed source data used in the valuations to supporting tenancy schedules and accounting subledgers;
- Tested the mathematical accuracy of the internal valuation model, including assessing key valuation inputs with reference to those applied by the external valuation experts and where relevant we assessed the reasonableness of comparable transactions used in the valuation process;
- Where relevant, we evaluated the movement in the capitalisation rates, occupancy rates, and stabilised average EBITDA across the portfolio based on our knowledge of the property portfolio, comparable acquisition transactions in the period, published industry reports and comparable external valuations; and
- We considered the adequacy of disclosures in relation to the valuation methods and principles disclosed in Note 2(o) Summary of significant accounting policies -Investment properties, Note 3 Significant accounting judgements, estimates and assumptions -Revaluation of investment properties, Note 9.1 Investment properties and Note 9.3 Non-financial assets fair value measurement.

# Information Other than the Financial Report and Auditor's Report Thereon

The directors are responsible for the other information. The other information is the Director's report accompanying financial report.

Our opinion on the financial report does not cover the other information and accordingly we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial report, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial report or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

## Responsibilities of the Directors for the Financial Report

The directors of the Trust are responsible for the preparation of the financial report that gives a true and fair view in accordance with Australian Accounting Standards and the *Corporations Act 2001* and for such internal control as the directors determine is necessary to enable the preparation of the financial report that gives a true and fair view and is free from material misstatement, whether due to fraud or error.

In preparing the financial report, the directors are responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters relating to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Group or to cease operations, or have no realistic alternative but to do so.

## Auditor's Responsibilities for the Audit of the Financial Report

Our objectives are to obtain reasonable assurance about whether the financial report as a whole is free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Australian Auditing Standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of this financial report.

As part of an audit in accordance with the Australian Auditing Standards, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial report, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.
- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial report or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial report, including the disclosures, and whether the financial report represents the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the financial report. We are responsible for the direction, supervision and performance of the Group audit. We remain solely responsible for our audit opinion.

We communicate with the directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the directors with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated to the directors, we determine a specific matter that was of most significance in the audit of the financial report of the current year and is therefore the key audit matter. We describe this matter in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.
